

FEARLESS.

Ordinary People Doing Extraordinary Things in a World Gripped by Fear. By Lisinka Ulatowska

Fearless combines front-line scientific information about the nature of our universe with fascinating material addressing the deepest recesses of the human soul. To be read and enjoyed by everyone keen on knowing what this world -- and we ourselves -- are really like. Prof. Dr. Ervin Laszlo, Founder and President, Club of Budapest and Member, Club of Rome.

Fearless is an exciting novel. It provides a harrowing account of how fear takes over government policies and infects the lives of their citizens. Only the powerful drive to live and thrive can dispel it. But can the compelling all-win principle stop the epidemic of fear that has most of the world in its grip?

The story opens in the year 2010 in a sumptuous mansion on the idyllic Costa Rican shore where Bertram, a business consultant, Pim, a systems scientist, and Mary and her crew of young people meet in an out and out attempt to halt the fear epidemic.

Fear is causing wholesale slaughter in the nation of Kukundu, gaining momentum in over 100 dictatorships, and securing a stranglehold on the “free” world. In the background lurk the Masters of Fear themselves, the Holy Order of the Snake, close to gaining control of the Planet.

As the narrative leads us from people working in the underground resistance to people at the U.N., and from street children to Heads of State, we experience the heights to which the human spirit can soar and the power available to “ordinary” people (from young to very old). We also become acquainted with the tools that we, too, can use to break through the confines of fear. For there are frightening parallels between the fear epidemic set in 2010 and today’s world.

This novel provides invaluable insights for business people, educators, statesmen and women, NGOs and all people confronted with the challenges of living in to-day’s world. It presents an anatomy of fear and its resolution--both profoundly complex and yet compellingly simple once you know where to begin. Other themes include:

1. Scientific approaches which can help us come to grips with globalization more peacefully;
2. Instances where science and spirituality have come to similar insights;
3. How to inspire students/people to flourish without using fear;
4. The role the UN is playing as motor and coordinator of globalization and where it is a hurdle.
5. How the Universal Declaration on Human Rights can be seen as integral to human evolution;
6. The importance of the all-win principle in humanity’s evolution.
